This Is No Time For Modesty

Normally, this paragraph would be a bunch of nonsense about who The Bad Hand sounds like and why they use fake names, primarily those of Bruce Willis characters. Why even have a write-up? The music is self-explanatory. I guess there needs to be some sort of literature with the CD, so that you don't ignore it and toss it in a pile with all the other unsolicited crap you're not going to listen to. That would definitely be a mistake. Also, this is a good way to let you know that The Bad Hand is from San Francisco. They've been playing shows there and elsewhere for about two years, with a rotating cast of lunatics, guest musicians and other characters (most of whom can be found somewhere on the album). The guys in The Bad Hand like to say that they're an "indie-jazz-punk" band when pretentious hipsters ask them what they sound like. We here at P-Dice think they sound like a house party being run over by a Mardi Gras float. Anyway, take a listen to the music and if you like it, great. If not, give it to an intern. They love free stuff.

Available on 12" LP
